

Game Rules For Ring Toss

To setup the game place the pegs in the two boards which are then placed together to form a cross. Each of the pegs will correspond to a different point value ranging from 10-100 points. The game can be played by 2 or 4 players (as two teams of two)

In the two player game each player takes two different coloured rope rings (or 1 in the 4 player game) and attempts to throw the rings over the wooden pegs from a range of 20 feet. If a ring lands on a peg then the points from that peg are added to the score. Note if the ring lands over 2 pegs then both scores are added!

Each player or team continues to throw the rings in turn until a score of 500 is reached and the winner decided.

As your skills increase the range from which you throw.
