

## Game Rules For

# PICK UP STICKS

The game includes a variety of coloured sticks each of which is worth different points in the game.

25 points – 1 stick with the following colours – Orange Blue and Green

15 points – 2 sticks with the following colours – Blue Yellow and Red

10 points – 3 sticks with the following colours – Green and Blue

5 points – 5 sticks with the following colours – Blue and Orange

2 points – 14 sticks with the following colours – Yellow and Red

To start take all the sticks and hold them vertically in your hands. Release the sticks and let them fall to the ground landing randomly in a heap. The aim of the game is to pick up as many sticks as possible and collect the most points. The first to 200 points is the winner.

The first player attempts to pick up a stick without moving any of the others. If he succeeds this stick is put to the side to be counted later and he then tries again. This is repeated until he moves a stick. At this point it is the next players turn.

Once all the sticks have been removed add up each player points and see who is winning! Repeat the game until the first player reaches 200 points.

For a longer game try to reach 500 points

**Have Fun**
